

Uninstall Sandbox Studio

Introduction

This wizard has been created to facilitate the uninstallation of Sandbox Studio in your environment. It automates as many steps as possible and deletes the data managed by the solution.

Running the wizard

1. Login to your AWS **Organisation Management account**.
2. Open a new [CloudShell](#) console (a link to open CloudShell can be found in the bottom left corner of the AWS console).
3. Ensure you are in the region where you want to install Sandbox Studio.
4. Run the following command:

```
bash <(curl -s https://dist.sandboxstudiosoftware.com/install.sh) --uninstall
```

The following should display:

```
~ $ bash <(curl -s https://dist.sandboxstudiosoftware.com/install.sh) --uninstall
Checking prerequisites...
✓ Prerequisites check complete

Downloading installer...
✓ Files downloaded successfully

Setting up Python environment...
✓ Environment ready

Welcome to the Sandbox Studio Installation Script!

04:44:27 ● === Sandbox Studio Uninstallation ===
04:44:27 ⚠ This will delete all Sandbox Studio CloudFormation stacks
04:44:27 ● Current AWS account ID: ██████████
04:44:27 ● Current AWS region: ap-southeast-2
▶ Is this the organization management account? (Y/n) █
```

The wizard will guide you through the uninstallation process.

In some circumstances, some resources are not being deleted by CloudFormation. The uninstallation script will retry automatically. If after the retry the resources are still not being

deleted, delete the resources manually before restarting the script.
