

Account template creation - Review

Having completed all the steps, the final step is to **Review** the selected settings and one satisfied that everything is correct, click **Submit** to create a new lease template.

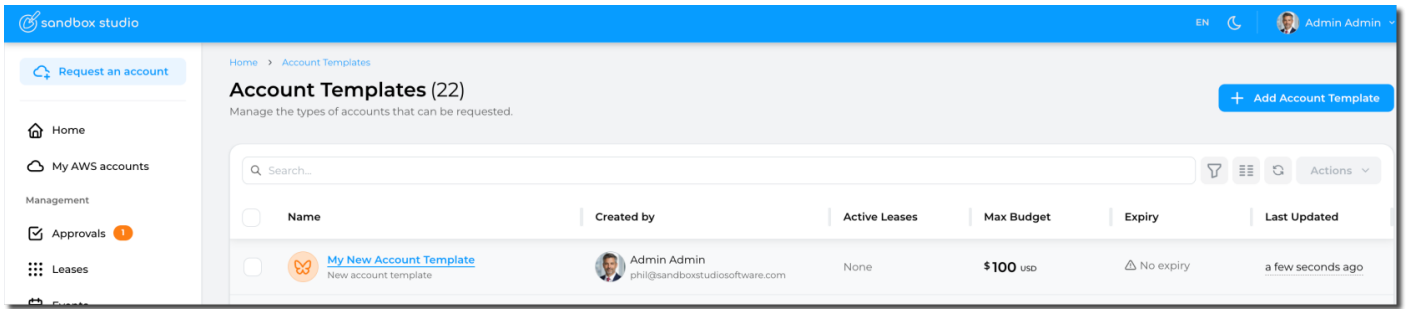

Users can then request a lease with this new lease template.

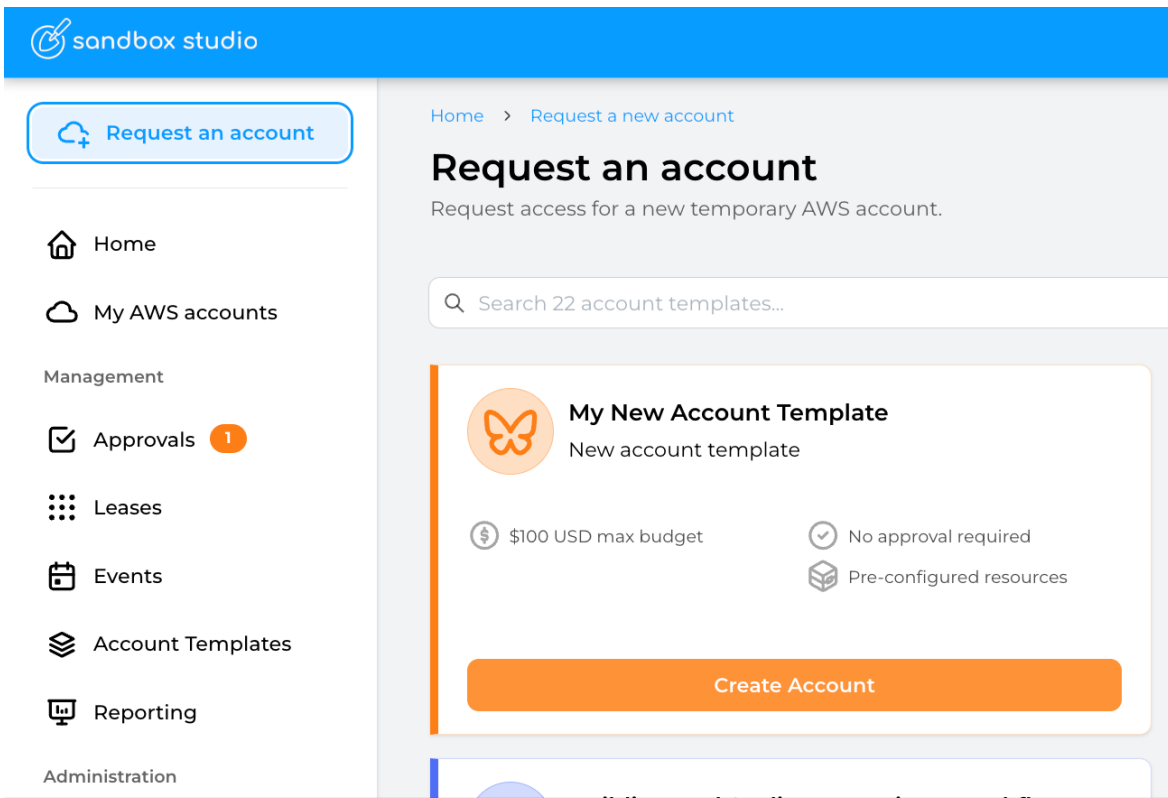

The screenshot shows the 'Add a new Account Template' page in the 'sandbox studio' interface. The page is titled 'Add a new Account Template' with the subtitle 'Give your users a new way to access a temporary AWS account.' A progress indicator on the left shows seven steps: Step 1 Basic Details, Step 2 Budget, Step 3 Lease Duration, Step 4 Account Permissions, Step 5 Roles & Access, Step 6 Launch Settings, and Step 7 Review (the current step). The main content area is divided into several sections:

- Basic Details:** Name: My New Account Template; Description: New account template.
- Tags:** This account template has no tags.
- Budget:** Maximum budget: \$100 USD. When an account using this account template reaches this limit, the account will be terminated and all resources in the account will be deleted.
- Actions:** 1 When \$100 USD is consumed → Wipe account.
- Duration:** This account template has no duration limit. Accounts of this type will continue to run until they are manually terminated or the maximum budget is reached.
- Account Permissions:** This account template is using custom permissions.
- AWS Managed Policies:** Amazon EC2 Full Access.

The new lease template becomes available immediately:

And end users can start using it:

Revision #6
