

Event creation - Account template

In this step, you define the account template you want to use in your event. The account template will define settings like:

1. Permissions
2. Resources created in the event
3. Budget
4. ...

Note: Account templates also define lease duration, but within an event, this is overridden by the event's own duration setting.

The screenshot shows the 'Create Event' interface in Sandbox Studio. The page is titled 'Create Event' and includes a progress bar with six steps: Step 1 (Basic Details), Step 2 (Account Template), Step 3 (Schedule), Step 4 (Participants), Step 5 (Managers), and Step 6 (Review). The 'Account Template' step is currently active. The main content area is titled 'Select Account Template' and contains a 'Manage Account Templates' button. Below this, there is a search bar and a table of available account templates. The table has columns for 'Name' and 'Created by'.

Name	Created by
<input type="radio"/> My New Account Template New account template	 Admin Admin phil@sandboxstudiosoftware.com
<input type="radio"/> Introduction to Terraform on AWS Introduction to Terraform on AWS	 Admin Admin phil@sandboxstudiosoftware.com
<input type="radio"/> Building with Amazon Bedrock https://catalog.workshops.aws/workshops/cdbce152-b193-43df-8099-908ee2d1a6e4	 Admin Admin phil@sandboxstudiosoftware.com
<input type="radio"/> Building and Scaling Agentic AI Workflows workshop Building and Scaling Agentic AI Workflows workshop	 Admin Admin phil@sandboxstudiosoftware.com

Having selected the account template, click on **Next** to move to [Event creation - Schedule](#)
