

Listing leases

As a Manager, you can see and manage leases. To have management access to leases, you need to:

- Have **Manager access** in Sandbox Studio
- Be granted **management permissions** on the account template that the leases use

Note: Administrators have full permissions and can see all leases.

To access leases, click on the "Leases" link in the left menu:

This displays the list of leases that are currently being used (Status Active, Locked, or Pending Approval):

Home > Leases

Leases (38)
Manage account leases here
