

# Reference : Lease States

Leases states in Sandbox Studio.

This table explains the various states the leases can be in at any given time.

State	Terminal state?	Description
Pending Approval	No	The lease request is pending approval from an Admin or a Manager.
Processing Approval	No	The lease approval is currently being processed by the system. This step should not be visible in the Sandbox Studio web UI.
Approval Denied	Yes	The lease request has been denied by an Admin or a Manager.
Withdrawn	Yes	The lease request was withdrawn before it was approved or processed.
Pending Setup	No	The lease has been approved and the account is being set up for the user.
Setup Failed	Yes	The account setup process failed. Admin intervention may be required to investigate and retry.
Active	No	The lease is actively being used by a sandbox user.
Suspended	No	The lease has been suspended. This can occur when manually suspended by an Admin or Manager, when the budget has been exceeded, or when the lease has expired. Sandbox users will no longer have access to the lease but the account could still have active AWS resources running.
Processing Termination	No	The lease is currently being terminated and resources are being cleaned up.
Expired ( <i>Terminated</i> )	Yes	The lease has reached its predefined maximum lease duration and the resources in the account are being cleaned up.

State	Terminal state?	Description
Budget Exceeded ( <i>Terminated</i> )	Yes	The lease has reached its predefined budget threshold and the resources in the account are being cleaned up.
Manually Terminated ( <i>Terminated</i> )	Yes	The lease has been manually terminated by an Admin or a Sandbox Manager and the resources in the account are being cleaned up.
Account Quarantined	Yes	The clean up process failed to terminate some of the resources in the account and manual intervention is required by the Admin to complete clean up. Refer to <a href="#">Troubleshooting guide</a> for more details on next action to perform
Ejected	Yes	An Admin has manually ejected the account out of the account pool.
