

Accessing environment details

For accounts with pre-provisioned resources, AWS resources are automatically provisioned when a lease is created. Template owners can configure specific outputs — such as environment variables, URLs, and credentials — to be surfaced to you once provisioning is complete.

These outputs are available from the account details page (1):

The screenshot shows the account details page for a Jupyter Notebook on SageMaker Studio. The account is active and has a budget of \$0.13 USD spent so far. The account will expire in 2 days, 20 hours, 25 minutes, and 30 seconds. The page includes a 'Login to account' button and a 'Terminate' button. A notification indicates that the account will be wiped when it expires.

Jupyter Notebook on SageMaker Studio ACTIVE Login to account

SageMaker Studio domain (new unified experience) with JupyterLab space

Lease ID
35a41962-54cf-424c-b41d-10089b4357dc

AWS Account ID
435717711087

Auto approved

Runtime
This account has been running for 3 days

This account will expire in:

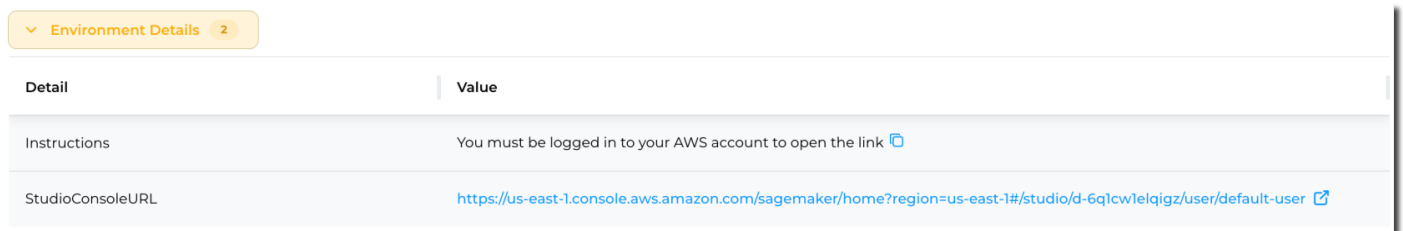

2	20	25	30
Days	Hours	Minutes	Seconds

Budget
No budget limit
\$0.13 USD spent so far

[Environment Details](#) 2 **1**

This account will be wiped when it expires. Terminate

Click on "Environment Details" to expand the details:

The screenshot shows the expanded 'Environment Details' section. It contains a table with two columns: 'Detail' and 'Value'.

Detail	Value
Instructions	You must be logged in to your AWS account to open the link
StudioConsoleURL	https://us-east-1.console.aws.amazon.com/sagemaker/home?region=us-east-1#/studio/d-6q1cwlqjgz/user/default-user

In case of sensitive information (eg Passwords), values will be automatically masked
