

# Home Page

After logging into the web UI, the following page displays.

From the home page (Figure 1), you can:

- Request a new account See (1) . For more information see: [Requesting a new account](#).
- View all of your current AWS Accounts. See (2)
- View your overall spend on all your current active accounts. See (3)

It is really important to monitor the **duration and budget** on all of your accounts. If they reach their thresholds, the accounts will (depending how your Sandbox Studio environment is setup) **terminate and delete everything** in that account. So if what you are working on is important, closely monitor the thresholds and/or move the account out of the sandbox environment into a production environment. You can [request an account extension](#) from your manager or administrator.
