

# Logging into an account

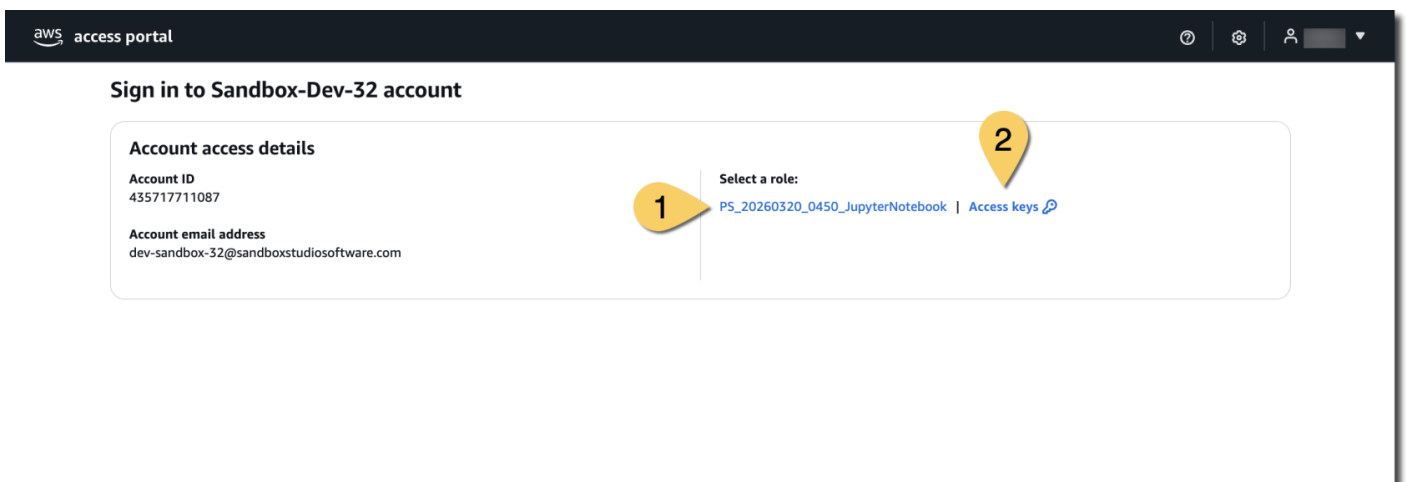

Once you've requested an account and the account is in an **Active** state, you can access login to the associated AWS console.

- On the home page, select **Login to account** (1) for the account you want to access. This directs you to the **AWS Access portal**.

The screenshot shows the AWS AI Prototyping account dashboard. At the top, it says "AI Prototyping" with a green "ACTIVE" status. Below this, there are three main sections: "Lease ID" (8fd8ccd8-c30e-450e-b5bb-1e8143600f8c), "AWS Account ID" (540128739465), and "Approved by" (Auto approved). The "Runtime" section indicates the account has been running for 9 minutes and will expire in 6 days, 23 hours, 47 minutes, and 21 seconds. The "Budget" section shows a gauge for spending, currently at \$0 USD, with a maximum of \$250. A yellow callout '1' points to the "Login to account" button in the top right corner. A warning icon at the bottom left states: "This account will be wiped when it expires or when account spend reaches \$250 USD." A "Terminate" button is visible in the bottom right corner.

- On the AWS Access portal, the **Account access details** box, you will find all the available roles that can be used for logging in. You can either:
  - **Select the role name** (1) you want to use. This will redirect you to the AWS console.
  - Alternatively, to retrieve your AWS CLI credentials, choose **Access keys** next to your desired role. This will open a pop-up with instructions for Mac, Linux, Windows and PowerShell environments.

The screenshot shows the AWS Access Portal "Sign in to Sandbox-Dev-32 account" page. The page has a dark header with the AWS logo and "access portal" text. Below the header, there's a "Sign in to Sandbox-Dev-32 account" section. On the left, there's an "Account access details" box containing "Account ID" (435717711087) and "Account email address" (dev-sandbox-32@sandboxstudiosoftware.com). On the right, there's a "Select a role:" dropdown menu. A yellow callout '1' points to the role name "PS\_20260320\_0450\_JupyterNotebook" and a yellow callout '2' points to the "Access keys" link.
